

Bihar AgriTech Summit 2017 | 16th December 2017

Agriculture is the backbone of the state of Bihar. The sector contributes around 19 percent of State GDP and generates around 75% of the gross employment. Despite the huge dependency of the State on this sector due to favorable agro-climatic conditions like fertile soil and abundant water resources, there is a huge scope to improve farm productivity through Technological interventions.

Technology has been a major disruptor in almost all the aspect of our lives and Agriculture world over also has not remained untouched from that. India has also been at the forefront of the global IT revolution. However, in Bihar and also in other states, farming at large is still practiced in its medieval ways and the sector hasn't seen huge technological interventions disrupting Agri value Chain

In light of this, Department of IT, Government of Bihar is organizing a daylong event for Technology demonstration in Agriculture and Horticulture on 16th December 2017 in Patna. The demonstration can be based on IT solutions which impact Crop Planning, Planting, Harvesting, Packing and Storing to ensuring farm to market outreach.

Department would like to invite any Startup, OEM or SIs working in this space leveraging IT as a solution enabler in Agriculture or Horticulture

It will be a daylong event and the demonstration space would be provided by the Department itself. The event would be a good platform for promising players with innovative solutions fitting state's needs might be picked up by the Agriculture department for a full- fledged development or procurement.

<i>Date</i>	<i>16th December 2017</i>
<i>Venue</i>	<i>Patna</i>
<i>Time</i>	<i>10 AM- 6 PM</i>

The detailed itinerary along with Venue would be communicated later on the website <http://dit.bihar.gov.in/> .
